

ATHARV PHADATARE

CYBER SECURITY ANALYST

+917058398969 | atharvphadatare78@gmail.com | Pune, India |

Links: [Github](#), [Tryhackme](#), [Linkdln](#)

PROFILE SUMMARY

Penetration Tester with hands-on cybersecurity experience equivalent to **2+ year** through internships, security labs, and independent projects. Skilled in web application and infrastructure testing using tools such as **Burp Suite, Zap, Nmap, Nessus, Wireshark, Sqlmap**, and **Metasploit**. Proficient in identifying and exploiting **OWASP Top 10** vulnerabilities through **manual and automated testing**. Completed **70+ TryHackMe labs (Top 5%)**. Strong in **Python and Bash scripting** for custom tooling and automation. **Certified Ethical Hacker (CEH)** with **practical knowledge** of HTTP protocols, network security, and secure coding best practices.

EDUCATION

Bachelor of Engineering In computer Engineering | SPPU Pune

Oct 2021 – Jul 2025

WORK EXPERIENCE

Internship, VERZEO | Pune

Nov 2022 – Dec 2022

- Learned cybersecurity fundamentals, ethical hacking, kali Linux, Bash scripting, networking, packet analysis, Owasp Top 10, and Security documentation.

Internship, Cyber Secured India | Pune

Jan 2024 – Mar 2024

- Completed foundational cybersecurity training, focusing on network protection, threat detection, ethical hacking, malware analysis, security tools, and industry standards.

TECHNICAL SKILLS

Operating Systems & Virtualization: Windows, Linux, Hyper-V, VMware, VirtualBox.

Networking: TCP/IP, Firewalls, VPN, Netcat, Packet Analysis, OSI Model, IDS/IPS Concepts, DNS & DHCP, Routing & Switching basics, SSL/TLS Certificate management.

Security Tools: Burp Suite, OWASP Zap, Nmap, Nessus, Wireshark, SQLMap, Metasploit, Amass, Gobuster, Subfinder, Masscan, Nuclei, Hashcat, John the Ripper, Shodan, Censys.

Offensive Security: Penetration Testing, VAPT, Reconnaissance, Network Scanning, API Pentesting, Threat Modeling, CVSS, OSINT, Privilege Escalation.

Industry Standards: OWASP TOP 10, OWASP API TOP 10, MITRE ATT&CK

Scripting: Python, Bash

CERTIFICATION

Certified Ethical Hacker [\[view\]](#)

Introduction to Networking and Cloud Computing , Microsoft [\[view\]](#)

Introduction to Computers and Operating Systems and Security [\[view\]](#)

Cybersecurity Threat Vectors and Mitigation , Microsoft [\[view\]](#)

Cybersecurity Solutions and Microsoft Defender [\[view\]](#)

Cybersecurity Identity and Access Solutions using Azure AD [\[view\]](#)

PROJECTS

1. [Automation-with-Python](#): Collection of Lightweight Python Scripts for Recon & Web Testing.
2. [Windows Keylogger \(Cpp\)](#): Studied malware behavior to understand detection and prevention methods.
3. [DLL Injectors \(Cpp\)](#): Explored process injection techniques to understand exploitation risks.
4. [Pentest-And-Reports](#): Focused penetration test of CTFS, Labs; Documented findings with PoCs.
5. [C2Sentinel \(Cpp\)](#): Simulated command-and-control traffic for threat detection practice.
