

ATHARV PHADATARE

CYBER SECURITY ANALYST

+917058398969 | atharvphadatare78@gmail.com | Pune, India |

Links: [Github](#) , [Tryhackme](#) , [Linkdln](#)

PROFILE SUMMARY

Penetration Tester with hands-on cybersecurity experience equivalent to 1+ year through internships, security labs, and independent projects. Skilled in web application and infrastructure testing using tools such as Burp Suite, Nmap, Wireshark, and Metasploit. Proficient in identifying and exploiting OWASP Top 10 vulnerabilities through manual and automated testing. Completed 70+ TryHackMe labs (Top 5%). Strong in Python and Bash scripting for custom tooling and automation. Certified Ethical Hacker (CEH) with practical knowledge of HTTP protocols, network security, and secure coding best practices.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering | SPPU Pune

2025

CERTIFICATION

Certified Ethical Hacker [\[view\]](#)

OCT 2025

Deloitte Australia Cyber Job Simulation on Forage [\[view\]](#)

Introduction to Networking and Cloud Computing , Microsoft [\[view\]](#)

Introduction to Computers and Operating Systems and Security [\[view\]](#)

Cybersecurity Threat Vectors and Mitigation , Microsoft [\[view\]](#)

Cybersecurity Solutions and Microsoft Defender [\[view\]](#)

Cybersecurity Identity and Access Solutions using Azure AD [\[view\]](#)

TECHNICAL SKILLS

Operating Systems Virtualization: Windows, Linux, Hyper-V, VMware, VirtualBox

Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, Nessus, OpenVAS, Postman

Networking: TCP/IP, Firewalls, VPN, Netcat, Packet Analysis , OSI Model , IDS/IPS Concept

Cloud's Identity Management: Azure AD

Scripting: Python, Bash

Offensive Security : Penetration Testing , VAPT , Reconnaissance , Network Scanning , API Pentesting

WORK EXPERIENCE

Internship, VERZEO | Pune

Nov 2022- Dec 2022

- Learned cybersecurity fundamentals, ethical hacking, Kali Linux, Bash scripting, networking, packet analysis, OWASP Top 10, and security reporting/documentation.

Internship, Cyber Secured India | Pune

Jan 2024- Mar 2024

- Completed foundational cybersecurity training, focusing on network protection, threat detection, ethical hacking, malware analysis, security tools, and real-world scenarios.

PROJECTS

1. [Automation-with-Python](#) : Collection of Lightweight Python Scripts for Recon & Web Testing.
2. [Windows Keylogger \(Cpp\)](#) : Studied malware behavior to understand detection and prevention methods.
3. [DLL Injectors \(Cpp\)](#) : Explored process injection techniques to understand exploitation risks.
4. [Juice-shop-pentest](#) : Focused penetration test of OWASP Juice Shop; Documented findings with PoCs.
5. [C2Sentinel \(Cpp\)](#) : Simulated command-and-control traffic for threat detection practice.
